

China's World Economy & The World of China's Economy

The Thinkery - "Everything is Interesting" - Tuesday, November 17th, 7:30pm @ The Fix

It is increasingly difficult for commentators and businesses to make sense of China's World Economy. Abbreviations like IFIs, FTAs and FDI add to the complexities of understanding China's position in the world. At the same time, the World of China's Economy is becoming ever more complicated as well. Will it be possible to create a consumption-based economy? How will the reform of State-Owned Enterprises continue and what role can the services sector play?
