

## The Hopkins China Forum and

## The University of Chicago Alumni Club

cordially invite you to:

## The Rice Theory of Culture: China's Two Psychological Cultures

## **Thomas Talhlem**

Assistant Professor of Behavioral Science University of Chicago Booth School of Business

> Thursday, September 8<sup>th</sup>, 2016 19:15pm –20:30 pm

9 Qinghai Lu (just to the South of Nanjing West Road) 青海路 9 号,近南京西路,地铁二号线南京西路站

19:00 – Doors Open 19:15 – Lecture 20:00 – Q&A 20:30 – Mixer/Drinks/Dinner

Please RSVP to Frank Tsai of Hopkins China Forum by writing to editor@shanghai-review.org.

Psychologist Thomas Talhelm's study of the "rice theory of culture," recently published in *Science*, found large psychological differences between people in north and south China—and that these differences were correlated with the amount of rice historically grown in different provinces in China. Talhelm argues that rice farming's staggering labor requirements and irrigation networks encouraged labor exchanges and tight, reciprocal relationships. In contrast, wheat's lower labor and water requirements led to the north's more independent and free-wheeling culture.

**Thomas Talhelm** is an Assistant Professor of Behavioral Science at the University of Chicago's Booth School of Business. He researches cross-cultural differences and north-south cultural differences in China. He has lived in China (both north and south) for five years as a Fulbright scholar, Princeton in Asia fellow, and journalist, and holds a PhD in Social Psychology from the University of Virginia.

**About Hopkins China Forum:** Hopkins China Forum events are organized under the auspices of The Johns Hopkins University and its affiliated alumni associations worldwide. For more information on Hopkins events in Shanghai, please contact Frank Tsai at the Johns Hopkins University Alumni Association – Shanghai at <u>editor@shanghai-review.org</u>.
