INTERNATIONAL STUDIES

## The Hopkins China Forum and

同濟大學  
TONGJI UNIVERSITY

## Tongji University German Studies Center

cordially invite you to:

# *Global Cyberpower: The U.S., China, and the Future of the Internet*

## Madeline Carr

Senior Lecturer in International Relations  
Cardiff University

Monday, November 14<sup>th</sup>, 2016

19:15pm – 20:30 pm

9 Qinghai Lu (just to the South of Nanjing West Road)  
青海路 9 号, 近南京西路, 地铁二号线南京西路站

19:00 – Doors Open

19:15 – Lecture

20:00 – Q&A

20:30 – Mixer/Drinks/Dinner

Please RSVP to Frank Tsai of [Hopkins China Forum](http://Hopkins China Forum) by writing to [editor@shanghai-review.org](mailto:editor@shanghai-review.org).

Over the past twenty-five years, digital technologies have profoundly affected global power through the implications for military technology, commerce, communications, trade, education and finance. Due in part to its technological lead, the U.S. has been able to shape Internet technology in such a way as to promote its national interest and it has done so very successfully. China's lead in some of the technologies that will be fundamental to the next wave of innovation, particularly the Internet of Things, suggests that it will play a more significant role in terms of global technological leadership in the next twenty-five years than it has done previously. What lessons can be learned from the US experience in conceptualising a globally connected world? This talk offers a historical perspective and also some points for consideration in the future.

[Madeline Carr](#) is Senior Lecturer in International Relations at Cardiff University. Her research looks at the ways in which new technology both reinforces and disrupts conventional frameworks for understanding International Relations and the implications of this for state and global security, order and governance. Madeline has published on cyber norms, Internet Freedom, multi-stakeholder Internet governance, and the public/private partnership in national cyber security strategies, and her book [U.S. Power and the Internet in International Relations](#) (2016) is published with Palgrave MacMillan. Madeline is a co-lead on the Standards, Governance and Policy stream of the UK's £10M PETRAS research hub on the cyber security of the Internet of Things. She was selected in 2014 for the Welsh Crucible as a future research leader and is a multi-award winning teacher. Madeline is on the executive committee for the newly established ISA section STAIR (Science, Technology and Arts in International Relations) and is the 2017 co-program chair.

**About Hopkins China Forum:** Hopkins China Forum events are organized under the auspices of The Johns Hopkins University and its affiliated alumni associations worldwide. For more information on Hopkins events in Shanghai, please contact Frank Tsai at the Johns Hopkins University Alumni Association – Shanghai at [editor@shanghai-review.org](mailto:editor@shanghai-review.org).
