The U.S. government has imposed regulatory controls on Chinese tech companies that include Huawei, Tencent, and ByteDance. Dan Wang of Gavekal Dragonomics will review the actions the Trump Administration has already taken against Chinese tech and discuss what comes next.

[Dan Wang](#) is Technology Analyst at Gavekal Dragonomics, the Beijing-based economics research firm. He focuses on tracking China's technology progress — especially on semiconductors—as well as U.S. regulatory actions. He is also a contributor to Bloomberg Opinion and widely cited in press. Dan previously worked in Silicon Valley and studied philosophy at the University of Rochester.

[China Crossroads](#) hosts talks on all topics related to China, including business, foreign policy, and other areas as they relate to China, the idea being that China is both already a “crossroads” of the world and itself at a “crossroads” in terms of its future global influence.
