Saturday, November 7th, 2020, 16:30 – 17:45

Winter is Coming: How Weather Affects the Spread of Covid-19

John Ji

Assistant Professor

Environmental Health Science

Duke Kunshan University

Supported by:

The John Hopkins Alumni Club of China

The Duke Alumni Club of Shanghai

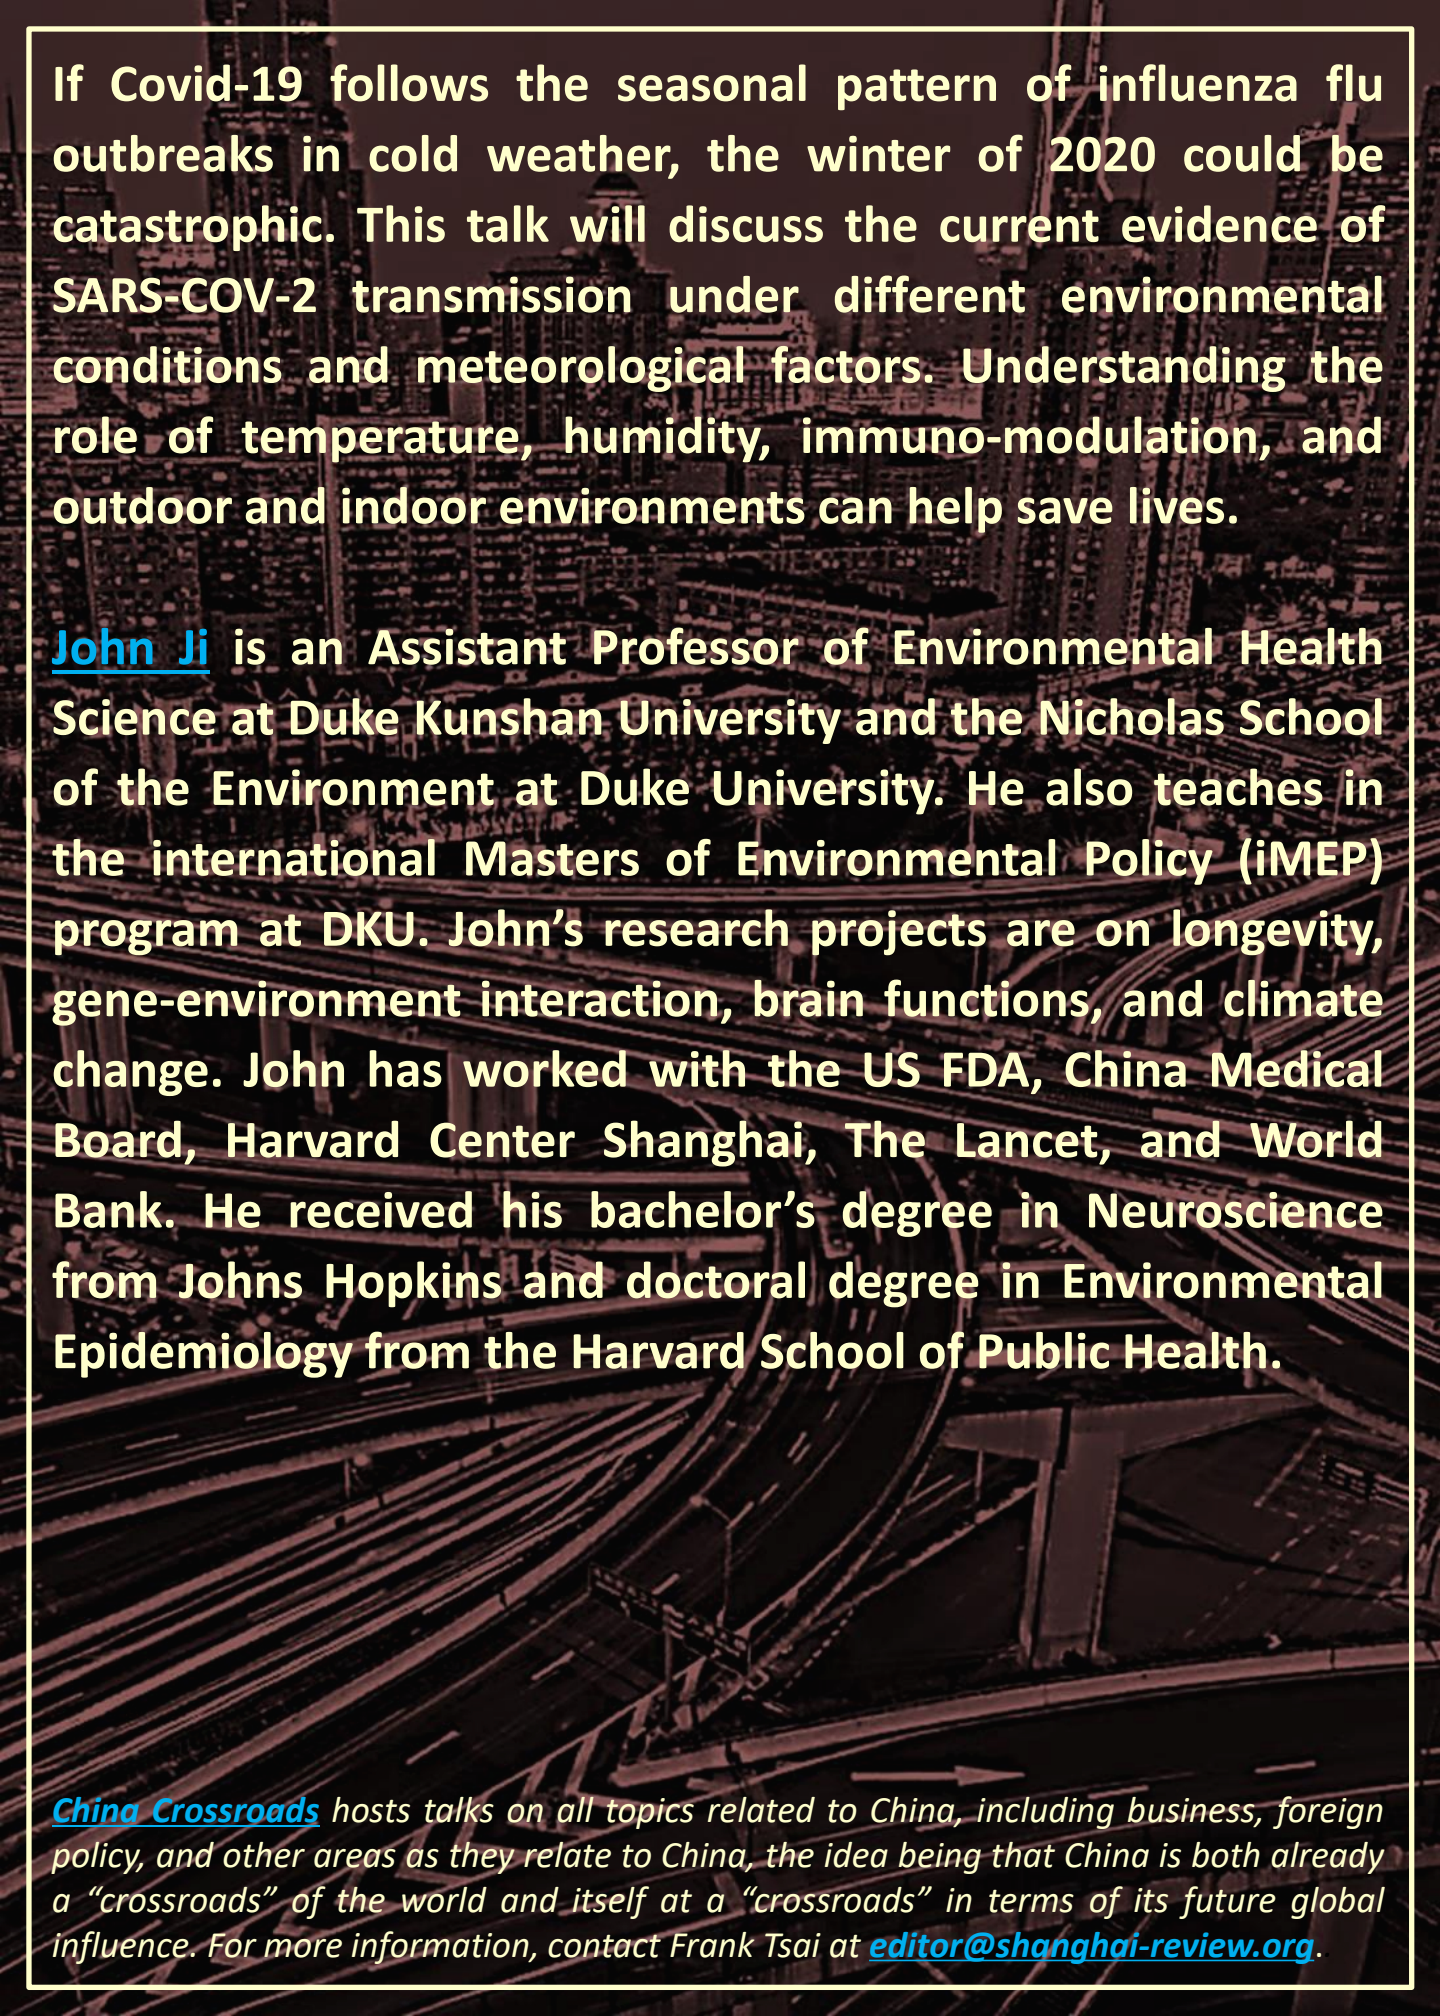

9 Qinghai Lu / Nanjing Xi Lu (青海路9号近南京西路)

Admission: 125 RMB Including Drink Ticket

RSVP to Frank Tsai at editor@shanghai-review.org.

If Covid-19 follows the seasonal pattern of influenza flu outbreaks in cold weather, the winter of 2020 could be catastrophic. This talk will discuss the current evidence of SARS-COV-2 transmission under different environmental conditions and meteorological factors. Understanding the role of temperature, humidity, immuno-modulation, and outdoor and indoor environments can help save lives.

[John Ji](#) is an Assistant Professor of Environmental Health Science at Duke Kunshan University and the Nicholas School of the Environment at Duke University. He also teaches in the international Masters of Environmental Policy (iMEP) program at DKU. John's research projects are on longevity, gene-environment interaction, brain functions, and climate change. John has worked with the US FDA, China Medical Board, Harvard Center Shanghai, The Lancet, and World Bank. He received his bachelor's degree in Neuroscience from Johns Hopkins and doctoral degree in Environmental Epidemiology from the Harvard School of Public Health.

[China Crossroads](#) hosts talks on all topics related to China, including business, foreign policy, and other areas as they relate to China, the idea being that China is both already a "crossroads" of the world and itself at a "crossroads" in terms of its future global influence. For more information, contact Frank Tsai at editor@shanghai-review.org.
