Over the last decade or so, Big Tech companies have leveraged data using AI and machine learning capabilities to extend credit to the unbanked population to support their inclusion in the banking, financial, and investment sectors. However, these massive strides in financial inclusion have led to emerging challenges in areas of financial stability and data privacy.

[Sidharth Kamani](#) is Senior Professional at New Development Bank, a multilateral institution founded by the Governments of the BRICS countries, where he has managed credit risk for the bank's investments in the BRICS countries, and is currently in the office of the President. Prior to this he worked for Goldman Sachs, managing market risk and liquidity risk for its global business activities. He regularly speaks at risk management conferences on topics of risk regulation and how digitization is changing the nature of financial intermediation. He has also published articles in leading media outlets on infrastructure development as well as the role of development banking.

[Rodrigo Zeidan](#) is Associate Professor of Business and Finance and Chief Sustainability Liaison at NYU Shanghai. He is also a Visiting Professor at Fundação Dom Cabral and Senior Scholar at the Center for Sustainable Business at NYU Stern, as well as columnist at Folha de S. Paulo, Brazil's leading newspaper. He is author of [Economics of Global Business](#) (2018). He holds a PhD in Economics from the Federal University of Rio de Janeiro.

[China Crossroads](#) hosts talks on all topics related to China, including business, foreign policy, and other areas as they relate to China, the idea being that China is both already a "crossroads" of the world and itself at a "crossroads" in terms of its future global influence.
