Is AI genuinely in a race to reshape our world, or is it merely weaving an intricate narrative? Regardless of its approach, it undeniably presents us with a spectrum of novel legal and policy challenges. In this presentation, we will thoughtfully examine some of the most significant legal and policy issues surrounding AI.

[Yao Di](#) is Head of Legal of Google Shanghai and Chair of the Legal Committee of the American Chamber of Commerce in Shanghai. Prior to Google, he was head of legal and business development for a Nasdaq-listed company in APAC and as senior associate at King & Wood Mallesons. He graduated from Stanford Law School and Shanghai International Studies University.

[China Crossroads](#) hosts talks on all topics related to China, including business, foreign policy, and other areas as they relate to China, the idea being that China is both already a “crossroads” of the world and itself at a “crossroads” in terms of its future global influence.
