Where is the next frontier with AI? And what does that mean for organisations and their leadership? Agile Plus Leadership has been recognised to be at the cutting edge of both leadership development innovation as well as AI application development, exploring Digital Twin architecture (ODT/DTO) and Multi Agentic Generative Systems (MAGS).

[Nick Obolensky](#) is the founder of Agile+, and teaches leadership at the Global EMBA of the Ecole Des Ponts Business School. He has a unique view of the future of leadership, based on a blend of western science and ancient Chinese wisdom. He has an eclectic leadership background, including youngest Major in the British Army, FTSE Director with line leadership of 12,000 staff, best-selling author, award winning business school professor, and green energy entrepreneur. In addition, having trained as an AI Specialist, and using rules-based systems based on AI principles with his leadership algorithms to get good results for over 10 years, he has been exploring the next frontier of AI. He will share a new view of leadership in the AI future and the next frontier of AI for the non-technical minded (of which he is one!).

[China Crossroads](#) hosts *talks* on all topics related to China, including business, foreign policy, and other areas as they relate to China, the idea being that China is both already a “crossroads” of the world and itself at a “crossroads” in terms of its future global influence. For more information, contact Frank Tsai at editor@shanghai-review.org.
