AI Transformation Is Just Starting: What Companies Don't Yet Know They Have to Do

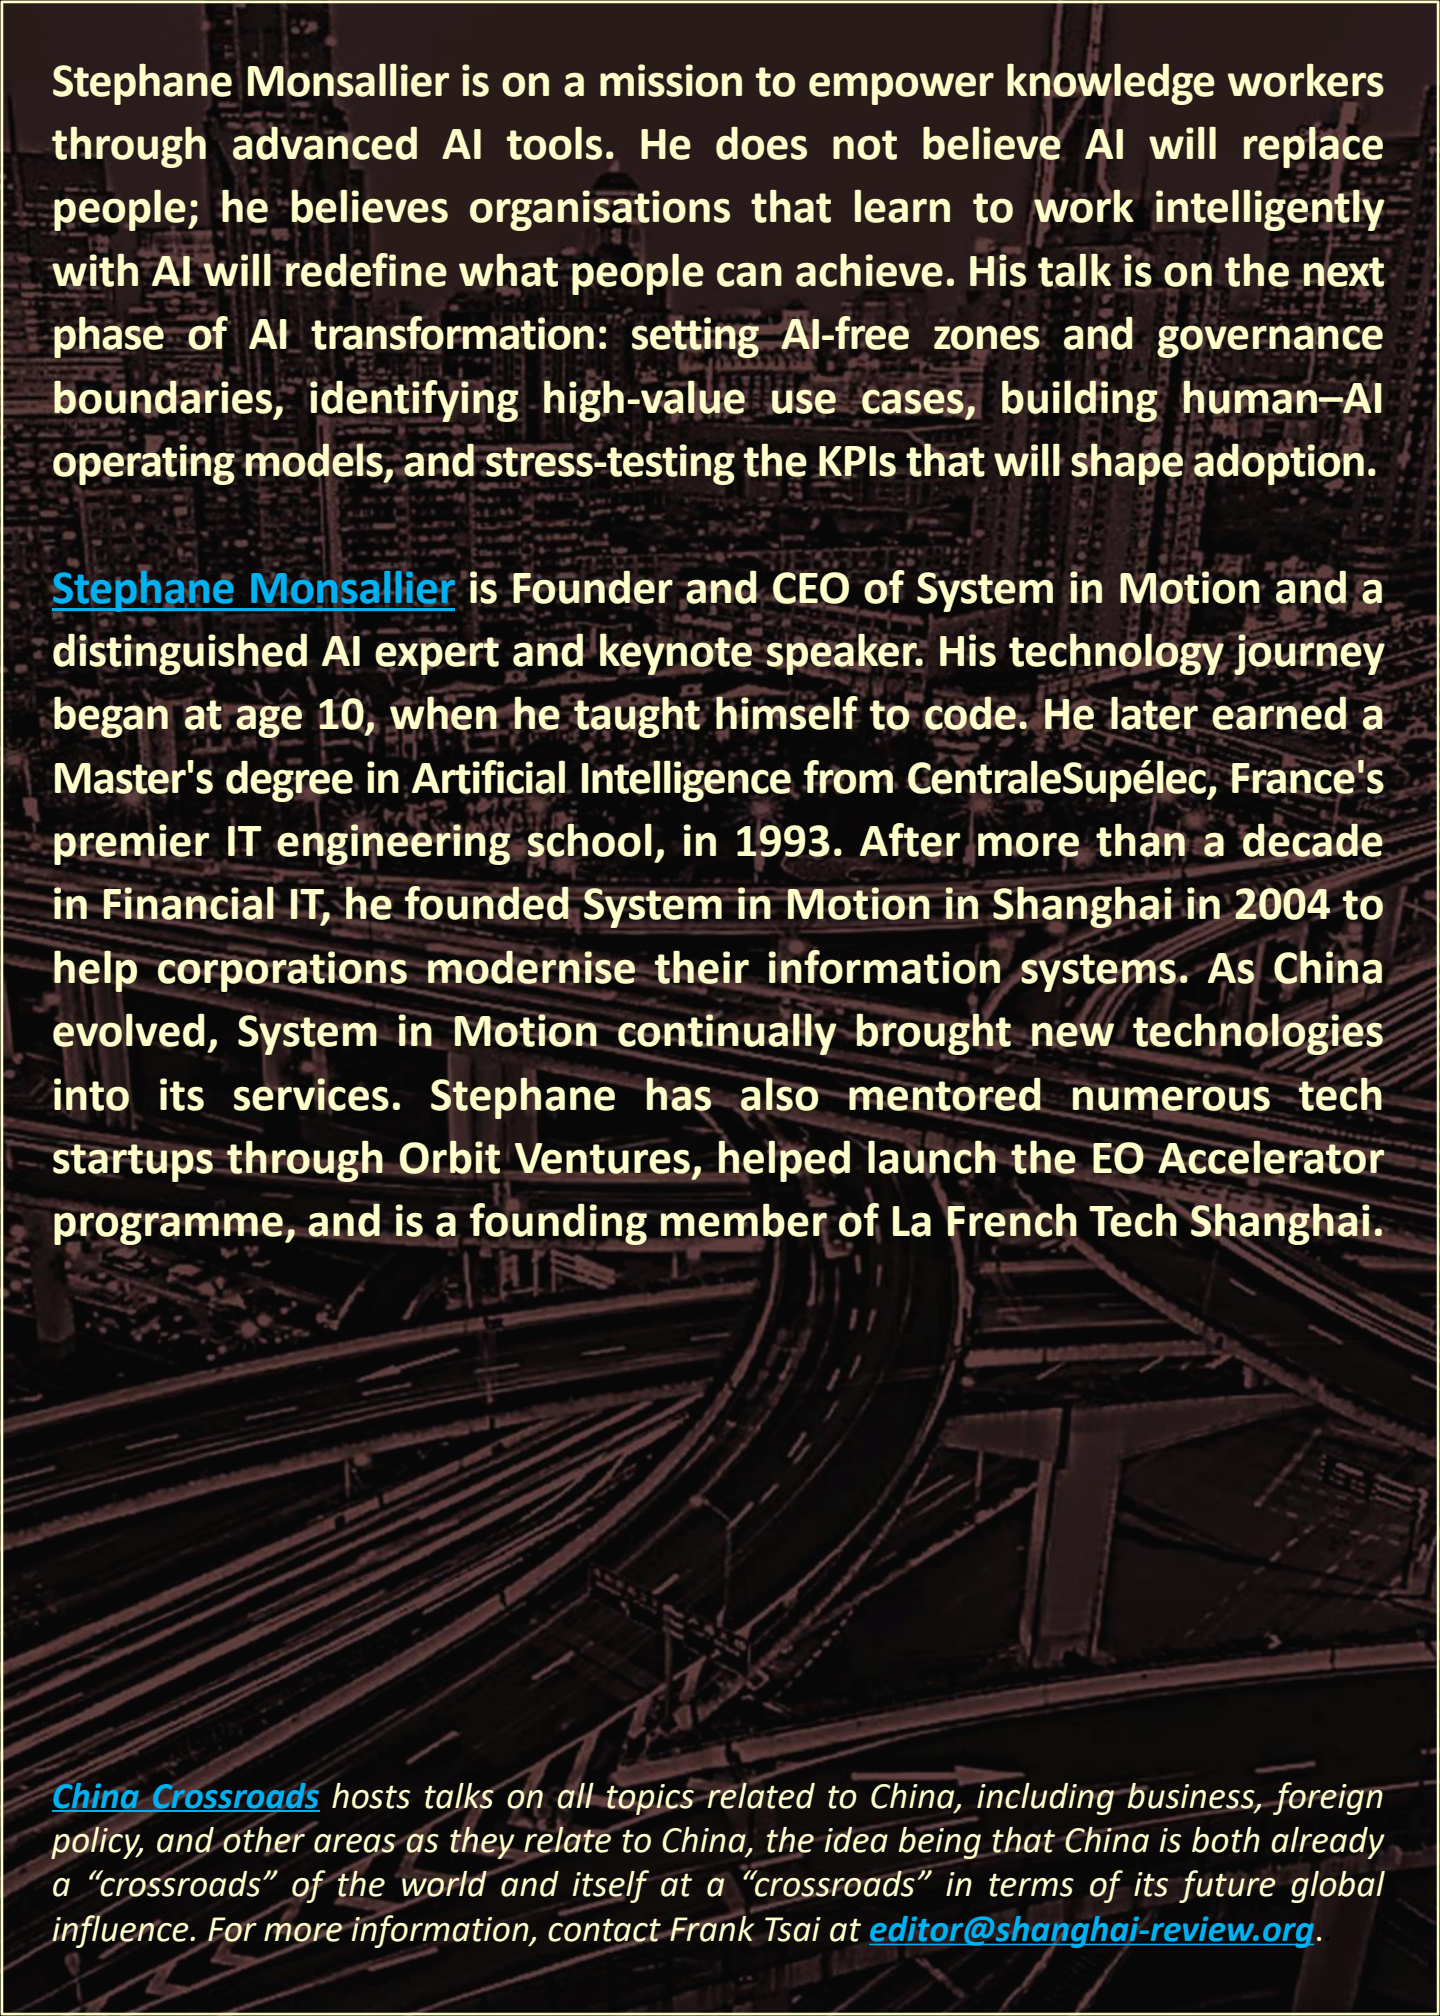

Stephane Monsallier

Founder and CEO of System in Motion

AI Expert and Keynote Speaker

WhiteSpace | Zhongcai Center 6F | 658 Niuzhuang Lu
200rmb admission with drink | FREE for members
Scan to RSVP or email editor@shanghai-review.org

Stephane Monsallier is on a mission to empower knowledge workers through advanced AI tools. He does not believe AI will replace people; he believes organisations that learn to work intelligently with AI will redefine what people can achieve. His talk is on the next phase of AI transformation: setting AI-free zones and governance boundaries, identifying high-value use cases, building human–AI operating models, and stress-testing the KPIs that will shape adoption.

[Stephane Monsallier](#) is Founder and CEO of System in Motion and a distinguished AI expert and keynote speaker. His technology journey began at age 10, when he taught himself to code. He later earned a Master's degree in Artificial Intelligence from CentraleSupélec, France's premier IT engineering school, in 1993. After more than a decade in Financial IT, he founded System in Motion in Shanghai in 2004 to help corporations modernise their information systems. As China evolved, System in Motion continually brought new technologies into its services. Stephane has also mentored numerous tech startups through Orbit Ventures, helped launch the EO Accelerator programme, and is a founding member of La French Tech Shanghai.

[China Crossroads](#) hosts talks on all topics related to China, including business, foreign policy, and other areas as they relate to China, the idea being that China is both already a “crossroads” of the world and itself at a “crossroads” in terms of its future global influence.
